

TY-DURA ENGINEERED SCREEN MEDIA

TY-DURA ENGINEERED SCREEN MEDIA

Ty-Dura rubber offers abrasion resistance in square, round or slotted openings. It is available in both hooked screen sections and modular panels, so there's never a need to make any changes to a deck set-up. Ty-Dura's tapered openings reduce pegging.

PULSE

Proper screen media selection begins with Pulse, Haver & Boecker's innovation in vibration analysis technology. It's designed specifically for analyzing the health of vibrating screens of all brands. Pulse detects irregularities that could translate into diminished performance, decreased efficiency and increased operating costs. We use Pulse to understand an operation's screening challenges, and work with our customers to integrate the best screen media products for each application.

APPLICATION

TOP SIZE	OPENING RANGE
Up to 18" depending on the application and tonnage	Square from 0.13" to 3.54" Round from 0.13" to 3.54" Slotted from 0.13" x 0.5" to 3" x 6"

TY-DURA HOOKED	TY-DURA PIN	TY-DURA SNAP	TY-DURA GROOVE	TY-DURA BOLT
Tensioned system 0.37" to 3" thick	Pin & Sleeve system 1.6" to 3.2" thick	Snap system 1.8" to 3.2" thick	Groove system 1.8" to 3.2" thick	Bolt-Down system 1.6" to 3.2" thick
